## SUMMARY

Software Engineer with 5+ years of experience building scalable mobile and web applications using React Native and modern JavaScript technologies. Strong background in banking and insurance systems, with focus on performance, user experience, and clean architecture. Experienced in developing end-to-end products and handling complex business logic.

## EXPERIENCE

### SOFTWARE ENGINEER | Apr 2022 — Oct 2023

Humano Seguros - Santo Domingo

Developed and maintained mobile applications using React Native. Built and optimized key features for client-facing insurance applications. Improved core user flows, enhancing usability and performance. Integrated REST APIs and managed complex application state.

### BUSINESS INTELLIGENCE ASSISTANT MANAGER | Oct 2021 — Apr 2022

Banco BHD - Santo Domingo

Managed business intelligence data flow and reporting pipelines. Collected, analyzed, and delivered insights to stakeholders. Supported decision-making through data-driven analysis.

### SOFTWARE DEVELOPER | Sep 2019 — Oct 2021

Banco BDI - Santo Domingo

Developed PL/SQL procedures, functions, and database solutions. Provided third-level technical support and incident resolution. Built internal tools and reports using Oracle technologies. Maintained and optimized database performance.

## EDUCATION

### Harvard University - Boston | CS50's Mobile App Development with React Native

| 2025

Learning mobile application development using React Native Built cross-platform applications with modern JavaScript practices Implemented navigation, state management, and API integrations Focused on writing clean, maintainable, and scalable code

**Universidad O&M - Santo Domingo | Systems and Computer Engineering**

| 2016 - 2021

Strong foundation in software development, data structures, and system design

**DevTalles | Master React Native**

| 2021 - 2023

Advanced mobile development concepts using React Native  
Applied best practices for performance optimization and component structure  
Implemented state management patterns and reusable architecture  
Worked on real-world scenarios and scalable mobile solutions

**SKILLS**

- React Native
  - Next.js
  - TypeScript
  - Oracle
  - State Management, API Integration
- React.js
  - JavaScript (ES6+)
  - PL/SQL
  - Jest, React Testing Library
  - Mobile App Development

**LANGUAGES**

Spanish

Greek

English

**ACHIEVEMENTS**

Achieved a GPA of 3.56/4.0, reflecting consistent academic excellence.
